Objective

Final-year Computer Science Engineering student with experience in developing AI-powered web applications, automation systems, and full-stack projects. Skilled in Python, FastAPI, React.js, Java, and Generative AI technologies. Interested in software development, AI applications, and building practical solutions that solve real-world problems.

Education

- B.Tech in Computer Science & Engineering, Invertis University (2023–2027) | CGPA: 7.4/10
- Completed **Intermediate (Class XII)** | Maharishi Vidya Mandir | **2023(CBSE)**.
- Completed **Class 10th** | Maharishi Vidya Mandir | **2021 (CBSE)**.

Skills

- **Programming:** Python, Java, SQL (PostgreSQL, MySQL)
- **Frameworks:** FastAPI, React.js, Node.js, Express.js
- **AI & Data:** Large Language Models (LLMs), Data Visualization, Generative AI Applications
- **Cloud & Deployment:** AWS EC2, Vercel, Netlify, Cloudflare, Render
- **Developer Tools:** Git, GitHub, VS Code
- **Core CS:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
- **Soft Skill:** Leadership, Team Collaboration, SDLC Fundamentals

Experience /Internship

Internshala ISP Program | Remote

OCT 2025 – NOV 2025

- Promoted Internshala training programs and internship opportunities among students.

Data Visualization Virtual Internship – Tata Group (Forage)

Sep 2024 – Oct 2024

- Enhanced dashboard functionality by integrating Python scripts for dynamic data manipulation and real-time updates.
- Collaborated in designing interactive dashboards using Tableau and Power BI to transform complex business data into actionable insights.

Projects

AI University Chatbot (<https://college-chatbot-frontend.vercel.app/chat>)

Tech Stack: FastAPI, Next.js, Python, Groq API, Llama 3.3 70B, Supabase, PostgreSQL, JWT, RAG

- Developed an AI-powered university chatbot using FastAPI, Next.js, Groq API, and Llama 3.3 70B to answer student queries related to admissions, fees, placements, and academics
- Implemented a Hybrid RAG-based system with Supabase and JWT authentication, enabling accurate university-specific responses, context-aware conversations, and secure user access.
- Deployed the backend on Render and the frontend on Vercel with public access and scalability.

TechnoviaX Multi Services WebApp (<https://technovia-x-phase-3.vercel.app/>)

Tech Stack: FastAPI, React.js, Supabase (PostgreSQL), Razorpay, UltraMsg API

- Developed a full-stack platform using FastAPI and React.js for lead management, payment processing, and WhatsApp notifications.
- Integrated Razorpay, UltraMsg API, and Supabase PostgreSQL to automate service workflows and data management.

Focistore – Software Discovery Platform (<https://store.focitech.in>)

Tech Stack: Next.js + Supabase + Admin Panel

- Developed a full-stack software discovery platform using Next.js, Node.js, and Supabase, enabling users to browse, search, and explore applications and games through a responsive web interface.
- Built a secure admin panel with authentication, catalog management (add, edit, delete), and cloud deployment on Vercel, allowing centralized management of software listings and content updates

Certifications

- InnovateNSUT'26 Hackathon Participant
- IIIT Delhi AMD AI Reinforcement Learning Hackathon Participant
- Coding Seekho Python Programming Certification
- **All Certificates:** <https://drive.google.com/drive/folders/1Wac7BrxORQmz73hYdIOgyHHQBHzXbhZi>
